

**Course Name : Electrical Engineering Group****Course Code : EE/EP****Semester : Fourth****Subject Title : Industrial Electrical Systems - I****Subject Code : 17416****Teaching and Examination Scheme:**

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03	01	02	03	100	--	25#	25@	150

**NOTE:**

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

**Rationale:**

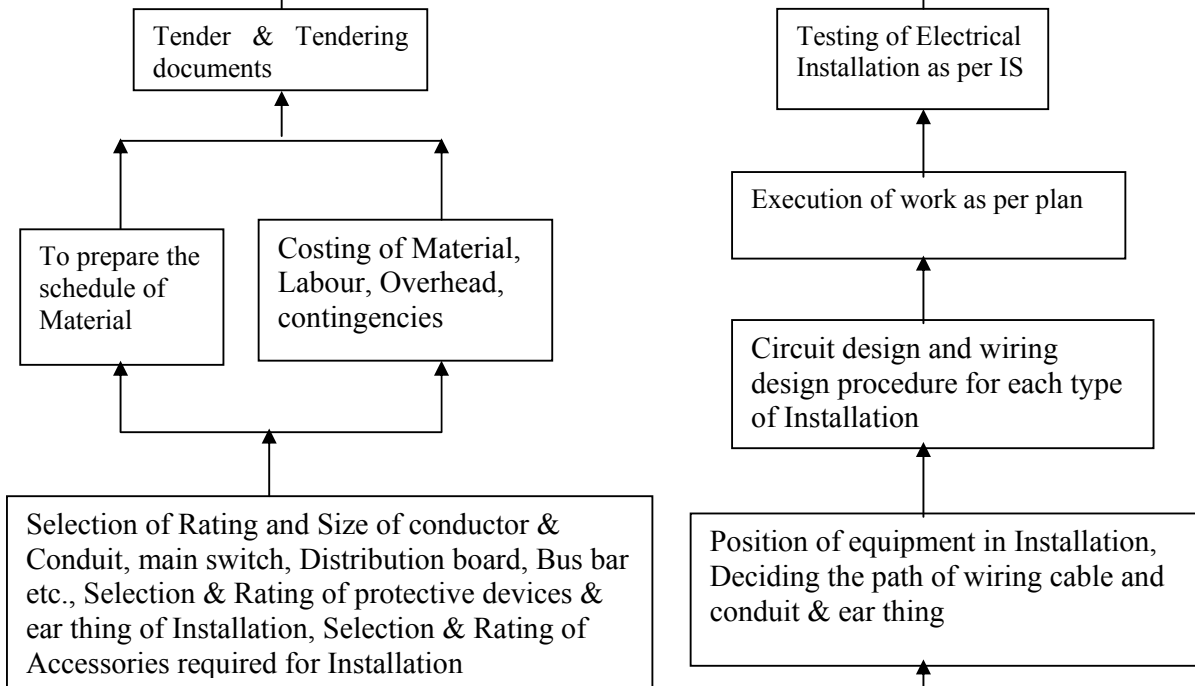

A diploma engineer is required to work as supervisor & knowledge worker in different organizations and is responsible to provide electrification. Maintain supply prepare design, estimates, read drawing, IE rules, data tables, specification, for all types electrical installation, Provision & maintaining earthing & all protective devices like MCCB,ELCB etc. Also Knowledge of maintenance, LT Lines, transformers, types of cables & wires are essential. Hence this core subject has been included at fourth semester in this curriculum.

**General Objectives:****The Students will be able to: -**

1. Read & interprets Electrical Installation drawings.
2. Understand & apply IE rules.
3. Make use of data tables & specification of wire, cables, LT lines & Distribution Transformer, MCCB, ELCB.
4. Understand principles & procedures of earthing.
5. Know basic terms to prepare design & estimate of installation.
6. Understand & apply procedures for contracts & tenders.

**Learning Structure:****Application:**

Estimating & costing of Residential, Commercial & Industrial Electrical Installation and prepare tendering documents, Testing of Electrical Installation and Evaluation & billing of executed work

**Procedure:****Principles**

Design consideration of Electrical Installation, Principles of circuit design for each type of Installation, Principles of execution of work

**Concepts**

Residential, commercial and Industrial wiring, Lighting and power circuit, wires, cables, overhead and underground wiring, earthing

**Facts**

Electrical Engineering Drawing, IE rules applicable to Residential, Commercial & Industrial Installation, General rules & Guidelines for Residential, Commercial & Industrial Installation, Data tables of conductor, Material and Accessories, Various plans & diagrams related to electrical Installation

**Theory:**

Topics and Contents	Hours	Marks
<b>1. Drawings and IE rules</b> Specific Objectives <ul style="list-style-type: none"> <li>➤ Understand different types of electrical Installation</li> <li>➤ Know and read Electrical drawings &amp; symbols</li> <li>➤ Know IE rules</li> </ul> <hr style="border-top: 1px dashed black;"/> <ul style="list-style-type: none"> <li>• Classification of electrical installations</li> <li>• General requirements of electrical installation</li> <li>• Reading &amp; interpretation of electrical engineering drawings &amp; symbols related to installations</li> <li>• Representation of different types of diagrams, such as schematic, circuit, wiring diagram and its single line representation as per IS code.</li> <li>• IE rules related to electrical installation</li> </ul>	04	10
<b>2. Service connections</b> Specific Objectives <ul style="list-style-type: none"> <li>➤ Select appropriate method for service connection</li> <li>➤ Differentiate between various service connections</li> </ul> <hr/> <ul style="list-style-type: none"> <li>• Concept of service connection</li> <li>• Types of service connections and their features</li> <li>• Methods of installation of service connection</li> <li>• Differentiate between underground and overhead service connection</li> <li>• Service connection for 11 KV H. T. Consumer</li> </ul>	04	10
<b>3. Electrification of residential Installation</b> Specific Objectives <ul style="list-style-type: none"> <li>➤ Select wires and wiring methods as per the requirement</li> <li>➤ Prepare comparison chart of various wiring accessories</li> <li>➤ Use given guidelines for residential installation</li> <li>➤ Calculate total electrical load</li> </ul> <hr/> <ul style="list-style-type: none"> <li>• Types of wires and wiring methods as per IS No.</li> <li>• General rules and guidelines for installation of residential electrification and positioning of equipments</li> <li>• Calculation of total electrical load in the residential installation</li> <li>• Procedure for the design of number of sub circuits</li> <li>• Method of drawing single line diagram</li> <li>• Selection of type of wire and wiring method</li> <li>• Load calculation and selection of size of wire by considering overload and future expansion</li> <li>• Determine length of batten and length of wire</li> <li>• Selection of rating for main switch, distribution board ,MCB,ELCB, and wiring accessories</li> <li>• Purpose of earthing and types of earthing</li> <li>• Determine length and size of earth wire</li> <li>• Prepare list of material for residential installation with their costing</li> <li>• Total estimation and costing of overall residential installation with proper cost of material , labour charges , contingencies charges</li> <li>• Determine per point charges</li> <li>• Wiring diagram for residential installation: Single Line and multiline</li> </ul>	12	24

representation.		
<b>4. Electrification of Commercial Installation</b> Specific Objectives <ul style="list-style-type: none"> <li>➤ Difference between residential and commercial installation</li> <li>➤ Prepare comparative chart for different ratings, size &amp; other technical specifications from manufactures/ dealers.</li> <li>➤ Use given guideline for commercial installation</li> <li>➤ Collect various specifications of wiring material</li> </ul> <hr/> <ul style="list-style-type: none"> <li>• Concept of commercial installation</li> <li>• Difference between residential and commercial installation</li> <li>• Difference between wires and cables</li> <li>• Types of cables required for commercial installations according to size and core</li> <li>• General requirements and selection factors for commercial installation</li> <li>• Load calculation and selection of size of service connection and nature of supply</li> <li>• Decide number of lighting and power sub circuits as per the IE rule</li> <li>• Decide size of wire/cable required for every sub circuit</li> <li>• Decide length of wire required for every sub circuit</li> <li>• Draw the single line diagram</li> <li>• Decide ratings of wiring accessories, main switch, bus bar MCB, ELCB etc.</li> <li>• Decide proper method of earthing for commercial installation</li> <li>• Prepare list of material for commercial installation with their costing</li> <li>• Draw the single line diagram</li> <li>• Find out the estimation chart with proper cost of material , cost of labour, contingencies charges and profit margin</li> <li>• Draw the circuit diagram</li> </ul>	12	20
<b>5. Electrification of Industrial Installation</b> Specific Objectives <ul style="list-style-type: none"> <li>➤ Based on criteria for selection decide if the installation is industrial installation</li> <li>➤ State difference between power wiring and actual industrial wiring</li> <li>➤ Guideline for industrial installation</li> <li>➤ Calculate detail estimate and costing of industrial installation</li> </ul> <hr/> <ul style="list-style-type: none"> <li>• Concept of industrial load</li> <li>• Concept of motor wiring circuit and single line diagram</li> <li>• Guidelines about power wiring and motor wiring</li> <li>• Design considerations of electrical installation in small industry/factory/workshop</li> <li>• Machine current calculations</li> <li>• selection of size for wires , cables required for the machines and its controlling unit</li> <li>• Decide length and size of cable required for the every industrial load</li> <li>• Decide ratings of wiring accessories, main switch, bus bar MCB, ELCB etc. for every industrial load.</li> <li>• Decide proper method of earthing for industrial installation</li> <li>• Prepare list of material for industrial installation with their costing</li> <li>• Find out the estimation chart with proper cost of material , cost of labour,</li> </ul>	12	24

contingencies charges and profit margin		
• Draw the circuit diagram		
<b>6. Contracts, Tenders and Execution</b>		
Specific Objectives		
➤ Draft tender documents		
➤ Fill tender documents following appropriate procedure and be present and act as per the requirements and rules while opening of the tender.		
➤ Prepare billing		
• Concept of contract and tenders	04	12
• Types of contracts and contractors		
• Types of tenders		
• Requirements of valid contract and good contractor		
• Tender notice		
• Procedure for submission and opening of tenders		
• Comparative statements for selection of contractors		
• Principles of execution of work		
• Billing of executed works.		
<b>Total</b>	<b>48</b>	<b>100</b>

**Tutorials:**

1. Electrical installation scheme for small bungalow or house. Draw wiring diagram and prepare detailed estimation and costing.
2. Electrical installation scheme for commercial building/ floor mill. Draw wiring diagram and prepare detailed estimation and costing.
3. Electrical installation scheme for small industry/factory/workshop/agriculture pump . Draw single line diagram and prepare detailed estimation and costing. Draw the circuit diagram

**Assignments:**

Skills to be developed:

**Intellectual Skills:**

1. Identify and apply different designing methods as per the requirements
2. Select proper ratings
3. Ability to analyse and select appropriate methods for estimation and costing

**Motor Skills:**

1. Drawing skill.
2. Measuring dimensions

**List of Assignments:** Problems & sheets on following topics.

- 1) Electrical estimation & design of residential consumers (for flats/Bungalows/Row houses)
- 2) Electrical estimation & design of Commercial consumers (for Malls/Colleges/Hospitals, Banks)

- 3) Electrical estimation & design of Agricultural consumers (Pump jets/submersible pump)
- 4) Electrical estimation & design of small & medium Industrial consumers.
- 5) Electrical Installation & layout preparation of your college campus.
- 6) Preparation of a NIT (Notice Inviting Tender)

Note: Estimations be made for loads up to 100 KVA

### Learning Resources:

#### 1. Books:

Sr. No.	Name of the Author	Title of the book	Name of the Publisher
1	J.B.Gupta	Electrical Installation Estimating & costing	S.K.Kataria & sons New Delhi
2	Raina Bhattacharya	Estimating design & costing	New Age
3	Allasappan & Ekambarm	Estimating design & costing	Tata McGraw hill
4	S L Uppal	Estimating & costing	Khanna Publisier
5	Surjit Singh	Electrical Estimating & costing	Dhanpat Rai & co.

#### 2. ISO, IS, BS standards, Data Sheets, IE Rules Handbook

IS/International code: IS5909, 7733, 2174, 732, 4648

#### 3. Charts, Models, CDs, Transparencies,

#### 4. Websites:
